Start doing

Creating document notes from the team and recieving more positive feedbacks

Started documenting meeting and daily standups and more frequent meetings to reach sprint goal (every 2 consecutive days)

Frequest testing of code and data

Helping someone if they are lacking behind on their part to complete

Clearing the view of the code by seperating it with comments to deliever better content

In person meetings on campus

Stop doing

The idea to display the music in queue and the music on shuffle mode

Displaying notification for music framnet whenever the specific song is played

Sharedpref for spinner in music fargmnet and sharedPref for colour picker in lights fragmnet since it was conflicting with the code and it made app crash

The idea of goggle assitant to control the media player

Declining all the stories just because we failed to make the code work

Continue doing

Recording all the meetings. No one missed any meetings. All present

Focus on sprint goals

Meeting deadline for the work that each individual has assigned.

Welcoming and positive team attitude

Doing more paried coding and designing

Asking questions and reasearching
